

Assessing capabilities

INTRODUCTION TO DATA CULTURE

Joanne Xiong

Content Developer, DataCamp

Maturity models

- Assess and plan organization improvement efforts
- Typically have multiple levels or stages
- Higher level:
 - More effectiveness
 - More efficiency
 - Better alignment with business goals
 - Improved performance

Customizing maturity models

Gartner Data Maturity Model

IBM Data Maturity Model

Awareness

- Knows the importance of data but lacks a plan for using data

Adoption

- Attempts for data-informed decisions but have limitations

Standardization

- Break through siloes across departments, unifying vision

Optimization

- Improve efficiency, coordinating between groups

Innovation

- Data culture in place, can use data to drive innovation

Case study: Shine & Glow

- Fictional company, organic skincare & makeup
- Have access to data but lack strategic plan
- Goal: leverage their existing culture to become a data culture
- Awareness level with lots of areas of improvements

¹ Icons made by Freepik from www.flaticon.com

Bridging the gaps

1. Assess current maturity level- may already be advanced!
2. Determine specific action items
 - Introduce new tools, technologies
 - Learn from more advanced teams
3. Monitor & adjust along the way
4. Foster collaboration and standardization

No one-size-fits-all solution to building a data culture!

Let's practice!

INTRODUCTION TO DATA CULTURE

The power of leadership and buy- in

INTRODUCTION TO DATA CULTURE

Joanne Xiong

Content Developer, DataCamp

Data leadership

- Leadership **IS NOT** necessarily top-level executives!
- Data leaders can be anyone within an organization
- Communicate and align data with strategic objectives

Data leader responsibilities

- Being data-first
- Identify areas where organizations can improve how data is used

- Knowledge sharing
- Mentor a colleague or hold office hours

¹ Icons made by xnimrodx and Aficons studio from www.flaticon.com

Data leader responsibilities cont.

- You're free to define data leaders
- Showcase data potential
- Top-level executives can be excellent data leaders!

¹ Icon made by Sumitsaengtong from www.flaticon.com

Buy-in matters

- Alignment between data leaders and executives is crucial
 - Obtain buy-in on resource intensive opportunities
- Buy-in required at every level to make the whole process sustainable

¹ Icon made by Afif Fudin from www.flaticon.com

Be mindful of barriers!

Barriers

- Lack of understanding
- Fear of data
- Lack of access to data

Solutions

- Unite data leaders and executives
 - Identify
 - Understand
 - Prioritize
 - Resource
 - Overcome

Let's practice!

INTRODUCTION TO DATA CULTURE

Becoming sustainable

INTRODUCTION TO DATA CULTURE

Joanne Xiong

Content Developer, DataCamp

Sustainability explained

Sustainable process

- Minimizes negative impact
- Generally targeting the environment, society, and economy

Sustainable data culture

- Creating a culture that can adapt and grow with the organization
- Ensuring the culture remains effective and efficient in the long term

¹ Icons made by Eucalyp from www.flaticon.com

Sustainable data culture

Unsustainable

- Lack of trust in data
- Inadequate data literacy
- Poor data quality
- Inconsistent decision-making

Sustainable

- Long-term commitment
- Trust
- Transparency
- Accountability
- Better compliance
- More informed decision-making
- Improved business outcomes

Benefits of a sustainable data culture

Benefits of a sustainable data culture

Microsoft & OpenAI - Long-term research, ethical considerations, and transparency

Adapt to changes

- Market changes, technology advancements, and evolving customer needs
- E.g., Microsoft & OpenAI

¹ <https://blogs.microsoft.com/blog/2023/01/23/microsoftandopenaiextendpartnership/>

Benefits of a sustainable data culture

Capital One - apply sustainable practices to cultivate behavioral and attitudinal changes

Adapt to changes

- Market changes, technology advancements, and evolving customer needs
- E.g., Microsoft & OpenAI

Empower employees

- Fostering ownership and engagement
- E.g., Capital One

¹ 2022 Capital One Environmental, Social and Governance Report

Benefits of a sustainable data culture

Amazon - ASDI provides free access to important scientific data

¹ Amazon Sustainability Data Initiative (ASDI)

The nuance

Building a data culture

- Prioritize data-driven decision-making
- Emphasizes data literacy training
- Values a culture of experimentation and improvement
- Goal: drive innovation, support organizational purposes

Building a sustainable data culture

- Goes beyond creating a data culture
- Minimize waste, reduce emissions, conserve resources, promote equity
- Prioritizes ethical considerations, and transparency
- Long-term planning and short-term increments over time!

Let's practice!

INTRODUCTION TO DATA CULTURE

Leaping into a data culture

INTRODUCTION TO DATA CULTURE

Joanne Xiong

Content Developer, DataCamp

IT and technology teams

- Implement and maintain the technology infrastructure for data management
- Can contribute by:
 - Ensuring effective data management and governance practices
 - Implementing data visualization and reporting tools
 - Collaborating with data scientists and analysts to develop customized solutions

¹ Icon made by rukanicon from www.flaticon.com

Data scientists, analysts, and engineers

- Critical roles
 - Collaboration with stakeholders
 - Education of others
 - Establish data standards
 - Streamline workflow
- Can contribute by:
 - Communicating data findings
 - Collaborating with data consumers

¹ Icon made by juicy_fish from www.flaticon.com

Data consumers

- Data consumers rely on data to perform their duties
 - E.g., managers, researchers, marketers, customer services, operations...(basically everyone)
- Can contribute by:
 - Recognize foundational data skills
 - Remain open to new ideas
 - Provide honest feedback

¹ Icon made by Ultimatearm from www.flaticon.com

Executives and management stakeholders

- Oversee the process
- Can contribute by:
 - Setting a clear vision and strategy
 - Allocating resources and support
 - Learning opportunities
 - Infrastructure

¹ Icon made by surang from www.flaticon.com

INTRODUCTION TO DATA CULTURE

Congratulations!

INTRODUCTION TO DATA CULTURE

Joanne Xiong

Content Developer, DataCamp

Recap

Chapter 1 - Getting to know data culture

- What data cultures are, and what they are not
- Why we strive to build a data culture
- What possible obstacles we might encounter

Chapter 2 - Data culture in depth

- Evaluating data culture progress with maturity model
- The roles of leadership and buy-in
- The importance of sustainable data culture
- Specific action items for each stakeholder
